

Grade 3/4 Planting - Term 2

Last week the Grade 3/4 students planted a number of native plants and grasses, kindly provided by Boroondara Council. The planting is intended to increase the amount of vegetation understorey such as shrubs, herbs and native grasses around the school grounds. At the moment 8% of our school grounds are made up of vegetation understorey and our aim is to increase this to over 15%. The latest planting day will go a long way to help us in achieving our goal. A big thank you to Mr Beechey for arranging all the plants, equipment and digging over 100 holes! Also thank you to Boroondara Council and the very kind parents who came along to help out during the day.
