

# Sustainability 2016

## Special Assembly by the Student Sustainability Leaders

On Friday 29<sup>th</sup> April 2016 the Student Sustainability Leaders did a fantastic job when presenting some of their thoughts on sustainability issues. During a special assembly to the whole school, they told us about what sustainability means to each of them. This included a special focus on biodiversity. The students of the school were also reminded that each classroom is currently involved in preparing information and activities for this year's EnviroDay, an important date in the school calendar that takes place in Term 3.

Measures for saving energy, conserving water, producing less waste and composting were all presented. There was also a video showing the WWF Green Ambassadors Program.

The culmination of the assembly saw the unveiling of our new ResourceSmart School Sustainability sign with our one star sustainability rating. We reminded the students that each star takes approximately one year to complete. This means we are now more than a year into our sustainable mission. We are also well into our journey to collecting our second star in 2016.
